

## WALLPROTECTION WB

### PRODUCT DESCRIPTION

Synthetic resin skirting, through body colored to hide the effects of wear and damage. The smooth surface makes it easy to clean and more hygienic than traditional skirtings. Available in colors and a range of dual-colored options. For sanitary benefits, the profile is coved which will allow for it to be "set-in" to the flooring using a cold weld procedure for a totally homogeneous finish. Thanks to the particular material composition and to the specific cavity at the bottom, this skirting can also be chemically welded to the PVC floor, as often required by hygiene standards. The WB skirting profile can be coordinated with the other profiles in the wallprotection range - corner protectors (WA) and bumper guards (WP).

### MATERIAL DESCRIPTION

#### Synthetic Resin

RESINIL Thermoplastic synthetic resin for COEXTRUSION:

Made from primary resin whose composition based on Polyvinyl Chloride characterizes it for high resistance and optimized compatibility with regards to long-lasting adhesion with plasticized resins used in the coextrusion process, i.e. the permanent union of two materials with different degrees of Shore hardness.

RESINFLEX Plasticized thermoplastic synthetic resin:

Made from primary resin, its polyvinyl chloride composition provides high resistance and compatibility with Resinil in the COEXTRUSION process we use in most expansion joints. Thanks to the nature of the plasticizers used, the material maintains its essential elasticity characteristics over time.

## APPLICATION

1. Check that the substrate is solid, flat, clean, degreased and dry, verifying that the application temperature is not lower than 15°C in case of gluing;
2. Cut the profile to the required length;
3. Apply the adhesive (FIXXTEC) to the part of the profile to be adhesived, or remove the protective paper from the adhesive for self-adhesive versions, and position the profile correctly without further adjustments;
4. Apply the profile with uniform pressure without hammering;
5. Remove any adhesive residue from the profile immediately.

## CLEANING AND MAINTENANCE

### SYNTHETIC RESIN:

Das thermoplastische Kunstharz erfordert keine besondere Wartung.

Es lässt sich leicht mit farblosem, in Wasser verdünntem Alkohol oder mit normalen, ebenfalls in Wasser verdünnten Reinigungsmitteln reinigen, sofern diese nicht säurehaltig sind. Spülen Sie es zum Schluss nur mit Wasser ab. Verwenden Sie nicht scheuernde Schwämme oder Tücher, um Kratzer auf der Oberfläche zu vermeiden.
