

SYSTEM DESCRIPTION

Uptec is a patented system composed of only 3 basic elements, designed to create raised outdoor floors. These are height-adjustable polypropylene supports, with tilting head to compensate slope difference up to 5%. By simply blocking the locking ring on the head, you can switch from the self-leveling system to the fixed one.

The accessory applied above is made of rubber to ensure an anti-noise and anti-slip system.

SUPA2 PRODUCT DESCRIPTION

The Uptec SUPA2 accessory, designed to create 2 mm (5/64") joints, is made of two-component material: polypropylene for the fins and rubber to ensure an anti-noise and anti-slip characteristic.

The tabs can be removed using the SUPAK key depending on the floor configuration.
