

border+tec™ BOS

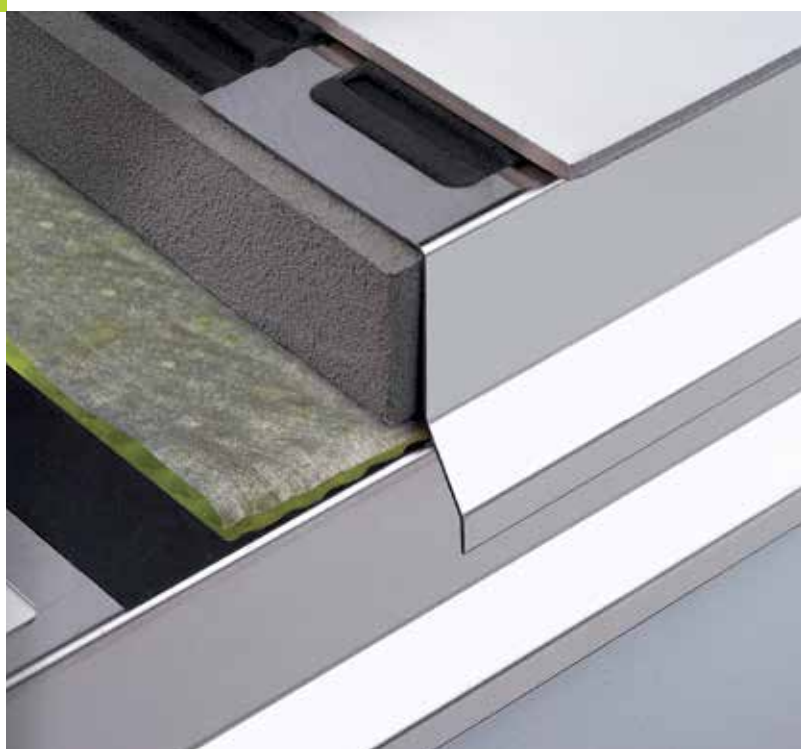

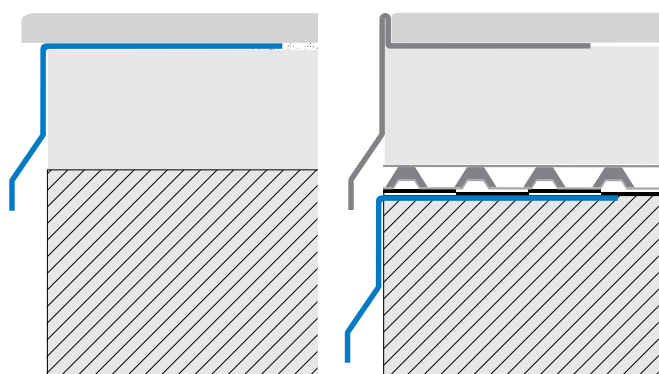

BORDERTEC BOS perimeter profiles are especially designed to finish and protect exposed concrete edges on balconies and terraces with protruding mortar bed installations. A protruding drip edge in the profile section protects the DRAINTEC 8 matting placed between the mortar bed and waterproof membrane. Leave a gap to allow for thermal expansion and contraction of the different materials; conceal the gap with an appropriate profile.

(BOS 42*)

INSTALLATION INSTRUCTIONS:

- Select the profile according to the tile and mortar bed thicknesses.
- Position the profile around the perimeter of the balcony or terrace simultaneously with the tile installation.

BORDERTEC BOS-A* Powder - Coated Aluminum

This profile is coated with polyester powder along its entire surface.

External Corner Joint: cod. BOSE-A*

Connector: cod. BOSG-A*
