

listec LI 15

The **LISTEC LI 15** aluminum decorative profile is designed for ceramic tile wall coverings. The unique squared section perfectly aligns with modern rectified tile edges. Due to the 5/16" (8mm) profile thickness and interlocking plastic spacers, the strip profile is adaptable to any tile thickness over 9/32" (7mm). Internal and external corners may be finished with SQUAREJOLLY, ROUNDJOLLY or KERAJOLLY joint profiles, avoiding 45° mitered corners. For information on the plastic spacers (LIA) see page 126.
