

mosaictec SJM

MOSAICTEC SJM is a multipurpose profile which joins floor and wall coverings. It can also be used as edging or as a decorative insert due to its perfectly symmetrical shape.

This profile was especially conceived for thin floors and mosaics. Its short and thin flange grasps the wall or floor covering, creating a clean and level finished surface.

MOSAICTEC SJM belongs to a series of profiles uniquely designed for mosaics. A specially-designed multipurpose cubic endcap suits all installation needs.

MOSAICTEC SJM 44 AS Silver Anodized Aluminum

This profile has a silver coating and is suitable for both indoor and outdoor application with high resistance to weathering and lower resistance to mechanical impact. During installation, excess adhesive and grout should be removed immediately to avoid stains.

MOSAICTEC SJM 44 AS Silver Anodized Aluminum Capsule Element

A single, symmetrical element acts as an endcap and resolves all types of internal, external and three-way intersections.
