

plano BF

Patented Plano Design baseboards are designed to fully integrate into the wall, becoming a smooth, level transition between the wall and floor covering. The base track is installed into the wall structure, flush with the plaster or drywall; the finishing profile seamlessly interlocks into the base. A horizontal, 3/16" (5mm) gap between the wall and finishing profile is a distinctive design element that also adapts to floor level differences of up to 3/16" (5mm). Plano Design, a modern design system.

The profiles are available in three finishes that coordinate with all interior designs: powder-coated aluminum to match with wall colors, anodized aluminum for modern and technical settings, and wood to match existing wood flooring.

INSTALLATION:

Please note: The structural base profile is installed along with the wall covering. The bottom of the profile should be installed at the same level of the finished floor. The finishing profile (BF 550) is installed after the floor installation is complete, compensating level difference of up to 3/16" (5mm).

An external corner joint / endcap is available in silver (BFC 550 AS) and white (BFC 550 AM 11), avoiding 45° mitered corners. Internal corner joints are not necessary as the profiles overlap.

PLANO BASE BF 600 ASN Extruded Silver Anodized Aluminum

This anodized aluminum profile (ASN) has a silver coating which offers good resistance to oxidation.

| | H = in | mm | Art. | | |
|---|--------|----|------|-----|-----|
| Material: Extruded Anodized Aluminum | 2-3/8 | 60 | BF | 600 | ASN |
| Finish: Silver (ASN) | | | | | |
| Length: 8'10" (2.70meters) | | | | | |
| Height BASE: 2-3/8" (60mm) | | | | | |

PLANOTOP BF 550 RO* Wood or Aluminum

The anodized aluminum profile version (ASN) has a silver coating which offers good resistance to oxidation. The color-coated version has a polyester powder coat that guarantees tolerance to most domestic cleaning products and weathering. The oak version is available varnished or natural.
