

ROUNDCORNER RE is a rounded corner profile conceived to protect exposed external tile corners. The profile is installed on site, laying the tile flush against the perforated flanges and creating a perfectly leveled corner. Typically used in heavy trafficked areas in public spaces such as hospitals, food processing plants and public bathrooms.

ROUNDCORNER RE-IL Polished Stainless steel AISI 304 - DIN 1.4301

Available in several sizes, this polished stainless steel rounded corner profile ensures good resistance to mechanical impact and high resistance to corrosion from most diluted chemicals found in laboratories and aggressive detergents present in food processing plants, commercial kitchens, slaughter houses, breweries, public bathrooms and hospitals.
