

roundjolly® RJE

The patented closed-section version of the **ROUNDJOLLY®** family is developed with cutting-edge co-extrusion technology which combines two polymer synthetic resins. The result is complete control over the visible surface, maintaining its mechanical resistance and aesthetic qualities. The trim profile section aligns along the tile and protects the edge from impact. It is a safe alternative to dangerously sharp external tile corners.

(RJE 80*)

ROUNDJOLLY® RJE Co-extruded Synthetic Resin

This innovative profile combines two polymer synthetic resins ensuring a highly-resistant and aesthetic visible surface. The internal flange is equally resistant and durable. Available in a vast range of colors, including new marbled effects.

Wall detail of a corner joint between **ROUNDJOLLY®** trim profiles and **ROUNDCAPSULE** endcap.

Other applications may be: top skirting finish (as seen in diagram) or edging of tile covering, natural stone or limestone as well as for moquette carpeting.

ROUNDJOLLY® RJE-P Solid Extruded Synthetic Resin

Extruded as solid synthetic resin, this profile is not simply color-coated; the color is fully embedded in the body of the profile and is available in a vast color range suitable in diverse design settings. This trim profile is easy to cut, saving time and money in the installation process and guaranteeing impeccably durable results. The profile is UV and scratch resistant, tolerant to mechanical impact and most domestic cleaning products.
