

**SANITEC SB 12** profiles resolve wall-to-wall or wall-to-floor transitions. The cove-shaped profile is easy to clean and offers a hygienic solution to internal corners in kitchen countertops, shower stalls and bathtubs, replacing silicone caulking that inevitably yellows and absorbs dirt over time.

**SANITEC SB 12 A Anodized Aluminum**

This profile has a silver coating (AS) which offers high resistance to corrosion and adequate resistance to use and wear. Also available in bright polished chrome (ASB), especially suited for matching polished bathroom accessories.
