

STAIRTEC FW is a stair nosing profile in solid oak with a perforated aluminum base that inserts into the mortar, ensuring maximum grip and stability. Its simple, curved design can be applied in both modern and traditional designs. Particularly ideal for residential applications, **STAIRTEC FW** can even be used for edging tiled kitchen countertops.

(FW 100*)

STAIRTEC FW-RON Natural Oak

A perforated aluminum base provides this solid, natural oak profile with rigidity and stability. The perforated flange inserts into the mortar, reinforcing the structure of the profile.

The profile is supplied pre-assembled. Prior to installation, the solid oak element should be treated with appropriate varnish or oil.
