

SUPAWTG

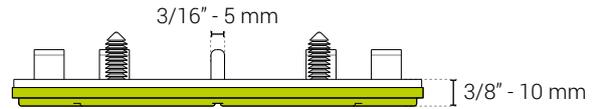

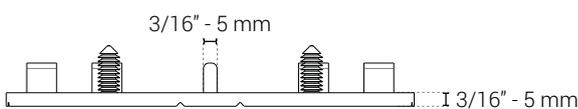

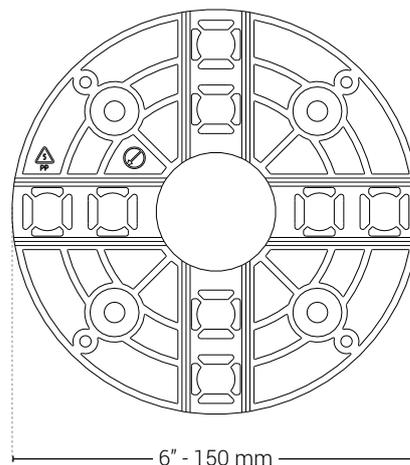

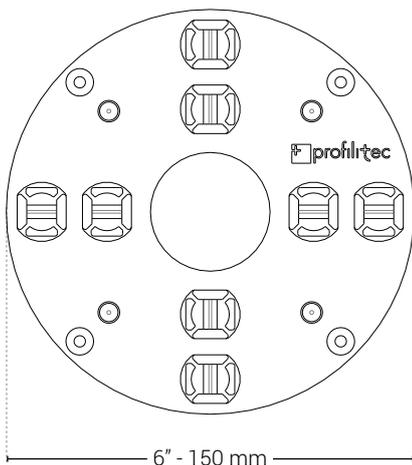

PRODUCT DESCRIPTION

SUPAWTG is polypropylene support designed for wood tiles installations where minimal elevation is required. It features 3/16" - 5 mm integrated tabs to ensure perfectly even joints, along with dedicated fixing pins that securely connect wood tiles, delivering fast installation, accurate alignment, and a stable surface.

Integrated openings allow quick anchoring to the substrate, while pre-formed cutting grooves make it easy to divide the head for precise positioning along perimeters and corners. SUPAWTG creates a 3/16" - 5 mm elevation, which can be increased using the SUPB extension, enhancing flexibility for reduced height installations.

TECHNICAL FEATURES

SUPAWTG + SUPB stackable extension
