

ARTIFICIAL TURF INSTALLATION SYSTEM

PRODUCT DESCRIPTION

The combination of the ZeroFlex grid and the SUPATURF panel creates surfaces that are draining, stable, and perfectly flat, making it ideal for terraces, rooftops, and hanging gardens.

Designed specifically for the application of synthetic turf, this system merges technology, comfort, and aesthetic value. It offers the pleasure of a green turf with the performance of a solid structural solution, transforming any environment into a balance between design and nature.

The SUPATURF panel guarantees a smooth and comfortable walking surface. It includes dedicated openings to ensure rapid and effective water outflow. For easy and secure installation, each panel is supplied with dedicated screws for fastening to the ZeroFlex grid, ensuring both structural strength and long-lasting durability.

TECHNICAL FEATURES

Thickness = 1/8" - 3.2 mm

uptec SUPATRAYZF >> ZeroFlex safety grid			
Item	Material	Environmental impact	pcs/pck
SUPATRAYZF	Polypropylene	Recyclable - non-hazardous waste	64
SUPATRAYZFSET2	Polypropylene	Recyclable - non-hazardous waste	2

uptec SUPATURF >> Panel for synthetic turf			
Item	Material	Environmental impact	pcs/pck
SUPATURF	Polypropylene	Recyclable - non-hazardous waste	16

Locking elements for ZeroFlex safety grid			
Item	Material	Environmental impact	pcs/pck
SUPATRAYGRIP2SET24	Natural aluminum	Recyclable - non-hazardous waste	24
SUPATRAYGRIP4SET24	Natural aluminum	Recyclable - non-hazardous waste	24
SUPATRAYGRIP2	Natural aluminum	Recyclable - non-hazardous waste	240
SUPATRAYGRIP4	Natural aluminum	Recyclable - non-hazardous waste	240

SUPATRAYGRIP
Locking Disc

ADVANTAGES

High load resistance

It can withstand extremely heavy loads, ensuring solid, stable, and safe flooring even in the busiest areas.

Structural strength

The grid maintains its geometry even under heavy use, providing a consistently safe and smooth walking surface.

No central pedestal required

The high structural strength eliminates the need for additional reinforcement pedestals, simplifying installation and reducing installation time.

Improved walkability

The rigidity of the grid and the cavity-free SUPATURF panel ensure a uniform surface, providing greater comfort, stability, and safety.

Quick and easy installation

Thanks to the compact, cavity-free surface of the SUPATURF panel, installing synthetic turf is quicker and easier.

Integrated drainage

Fully draining structure, without water stagnation.

Natural appearance

Reproduces the realistic visual effect of a real grass lawn.

Eco-sustainable

All components are made from recyclable materials.
