

SUPAANG240

PRODUCT DESCRIPTION

SUPAANG240

SUPAANG240 is an aluminum joist that guarantees stability and aesthetic versatility for raised floor installations. SUPAANG240 offers freedom and flexibility in terms of tile dimensions, tile laying patterns, and flooring materials that can be used for raised floor installations. It can be used in combination with Uptec supports and Uptec Ground (3/16" tabs).

The upper part is equipped with two special rails in which anti-slip and anti-noise rubber gaskets are inserted. The joist is supplied with the rubber pre-applied, saving installers valuable time and ensuring a quick and easy installation.

The lower part includes openings that ensure perfect water outflow and allow for height adjustment during and possibly after installation. Additionally, the dented geometry of the openings ensures a secure and stable attachment to the head of the support during installation.

TECHNICAL DRAWINGS

Length: 7'10-1/2"

## APPLICATION

1. Place and adjust the uptec support to the desired height by choosing the SUPA4 head;
2. Lay the joist on top of the uptec support; embedding it into the 3/16" spacer tabs;
3. Make the final millimeter adjustments with the SUPAK key by taking advantage of the holes in the base of the joist;
4. Place SUPDG spacer or SUPCLIPG depending on the type of covering material to be installed;
5. Lay the flooring.

## TECHNICAL FEATURES - SUPAANG240

Art.	Material	Finish	Dimensions mm	Dimensions inch	Weight	Environmental impact
SUPAANG240	T6 Aluminum	Natural aluminum	60x27,5x2400	2-3/8" x 1-1/8" x 7'10-1/2"	4.9 Pounds	Recyclable - non-dangerous waste
SUPAANGB240	T6 Aluminum	Black anodized aluminum	60x27,5x2400	2-3/8" x 1-1/8" x 7'10-1/2"	4.9 Pounds	Recyclable - non-dangerous waste

## PACKAGING

**Package:** 6 pcs

**Package weight:** 24.5 Pounds
