

## SHOWERTEC BALCONIES STC-DP

### PRODUCT DESCRIPTION

STC-DP

**SHOWERTEC BALCONIES STC-DP** is a horizontal sloped perimeter drain system with rectangular cross-section made of thermoplastic TPE material and resistant to impact and chemicals.

It is used for perimeter drains of balconies and terraces. Il sistema presenta un tubo di scarico a sezione quadrata e una flangia rettangolare rivestita da TNT per adattarlo al parapetto e per fornire un'adeguata superficie di incollaggio alla membrana impermeabilizzante **FOILTEC**. It is ready to be installed with the supplied **FOILTEC** gusset, suitable for connecting it perfectly to the **BALCOTEC** system.

The package contains 2 drains and 2 **FOILTEC** gussets.

### APPLICATION AND FUNCTION

The **SHOWERTEC BALCONIES STC-DP** horizontal drain system consists of a drain with a horizontal sloped outlet with a rectangular cross-section and a waterproofing gusset.

### MATERIAL DESIGN FEATURES

The horizontal bonding flange is manufactured from thermoplastic material and has a TNT-coated surface and **FOILTEC** gusset suitable for perfect connection to the secondary waterproofing system of the terrace. The package contains 2 drains and 2 gussets.

### AREAS OF APPLICATION

**SHOWERTEC BALCONIES STC** drains can be used in private homes as well as in hospitality or public buildings.

### METHODS OF APPLICATION

The subgrade must be load-bearing and sloped.

1. The **SHOWERTEC BALCONIES STC-DP** drain has a sloped drain pipe of rectangular cross-section (48 x 57 mm) that must be placed and bonded, or mechanically fixed, in a parapet opening.
2. Apply **FLOORTEC** to the screed by placing it flat against the flange of the drain, and bond by overlaying the pre-cut **FOILTEC** gusset using **KOLLTEC**.

### WARNING AND MAINTENANCE

**SHOWERTEC BALCONIES STC** needs no specific maintenance.
